## THE NEXT GENERATION OF HANDHELD CODE READERS

**SR-G100**

# COMMON CHALLENGES FACED BY HANDHELD DPM CODE READERS

## SLOW

Reading takes time, which causes operations to fall behind and leads to downed production lines

## UNSTABLE

Because reading time is inconsistent, mistakes such as duplicated or skipped reads may occur

## VARIABLE

Readings differ from person to person due to varying levels of understanding

## DIFFICULT

Figuring out the best settings takes a long time or can sometimes even be impossible

# THESE ISSUES AREN'T A PROBLEM FOR THE SR-G100

**HIGH-SPEED  
READING**

**STABLE  
READING**

**EASY  
OPERATION**

**EASY  
CONFIGURATION**

# HIGH-SPEED READING REGARDLESS OF OPERATOR

## WIRELESS COMMUNICATION IMPROVES FLEXIBILITY

Not only does being wireless improve the SR-G100's general flexibility, it also solves various problems that would otherwise be impossible to overcome.

No need to spend time on wiring

No interference from cables

No need to worry about damaged cables

**BUILT-IN FUNCTION BUTTON**

**EASILY CUSTOMIZABLE SETTINGS**

Automatic tuning is done simply by pushing the function button and reading a code. Use the device on site without the need to carry around a PC.

**Assess stability of reading and communication**

- Reading rate testing
- Radio wave testing

**ERGONOMIC SHAPE THAT REINFORCES OPTIMAL POSITIONING**

**CENTER-OF-GRAVITY DESIGN**

By naturally inducing a flat position, the SR-G100 reduces the impact of variations between users as well as variations in code marking styles. This makes it possible for anyone to read codes consistently and stably.

**MULTI-LIGHTING CONTROL FUNCTION**

**AUTOMATIC SELECTION OF OPTIMAL LIGHTING**

**Polarizing illumination**

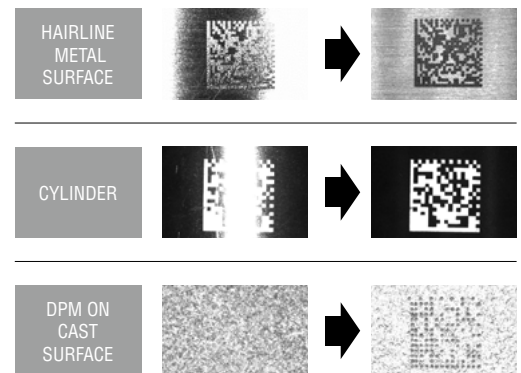

Removes glare from metal, black resin, etc.

**Multi-angle lights + partial lighting**

Reads DPM codes on metals including cylinders and cast surfaces

**CAPABLE OF HANDLING CHALLENGING CODES**

Code correction algorithms, developed for the SR-1000 Series of fixed mount code readers, have been optimized specifically for use with handheld code readers. This allows an ideal balance between reading consistency and speed.

Distorted codes on curved surfaces

Codes marked on milled surfaces

Codes marked on surfaces with projections and depressions

**COMPATIBLE WITH VARIOUS COMMUNICATION PROTOCOLS**

Support for EtherNet/IP™, PROFINET, and PLC link improves PLC compatibility. This allows for interaction with fixed mount code readers installed on equipment or on production lines. In addition, the OUT signal (OK, ERROR, BUSY, etc.) from the communication unit (SR-LR1) makes synchronization with the PLC even easier.

**Verification and tracking of main and sub parts**

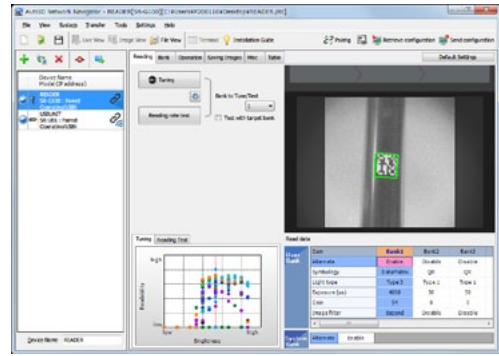

# CUSTOMIZABLE SETTINGS USING EASY CONFIGURATION SOFTWARE

AutoID Network Navigator **SR-H6W** NEW
